## Summary

Still Hungry and foolish. Eager to learn how to craft a Fast and Pretty web Apps. Javascript Addict.

## Experience

### Software Engineer Web Platform

Tokopedia

Mar 2021 - Present (1 year 1 month +)

I'm on the Tokopedia content and it enterprise team, the products are feed, play, blog, career site, company profile and several applications that are used internally

Here's what i do

- Develop feature based on PRD from product manager
- Develop beautiful UI based on figma and approved by UI/UX designer
- Do unit test and increase the branch coverage using @testing-library/react (minimum 80%)
- Do monitoring with new relic (commonly use NRQL), monitor JS errors, RPS, CPU Usage, create report about anomaly activity, planning how to fix it, and create backlog to be allocated by product PIC
- Improve core web vitals score
- All of my code quality controlled by principal engineer through code review before merged and deployed

### Software Engineer

SPE Solution

Aug 2019 - Feb 2021 (1 year 7 months)

Create web service for payment, switching, callback, inquiry etc. Connect bank or Fintech and their customer or their merchants. Also create interactive portal and dashboard for analytic report and manage transaction data.
